

## **Construction Update**

The unexpectedly poor soil conditions on the southwest side of our property have forced us to relocate the planned additions to Somers Middle School. Mrs. McIntyre and I met with Max Grebe, lead architect from LPW, on July 19<sup>th</sup> to discuss the new plans.

Max has come up with a two-story addition that includes everything from our previous design and saves 10,000 square feet, which should help keep us within our budget. The Design Oversight Committee will meet with Max on Thursday, August 9th, at 10:00 A.M. in the Middle School Conference room to review the new design.
